Swedish legume mince

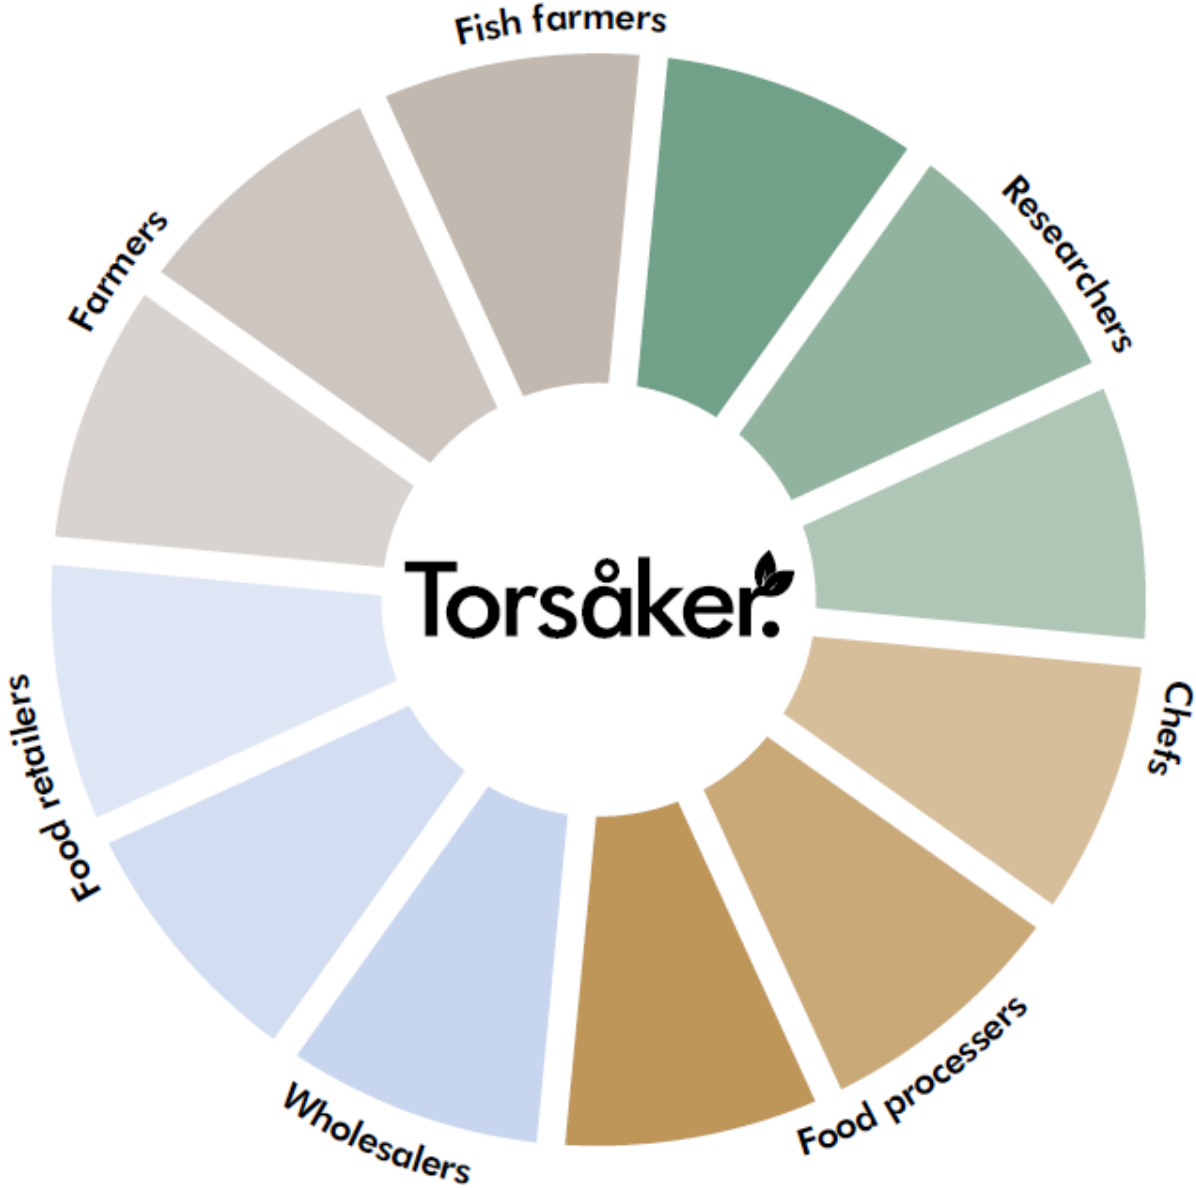

Future food – Torsåker Farm

The farm is situated 30 kilometers north of Stockholm and is **Axfoundation's** test farm and development center for the future's sustainable food production.

—
Our trinity

Our model

Product development

- from pulses to product

How we started ...

What does the latest research say?

What new product would yield the largest climate effect?

Start from an actual behavior (not wishful thinking).

Goal: Increase Swedish legume cultivation and replace imported minced meat!

Why legume mince?

In practice

Identify crops

Proof of concept

Fine-tune the product together with a customer (live-lab)

Develop end products that will generate enough profits in the value chain

Introduction to the market in steps

- School kitchens
- Small scale use in a delicatessen chain
- Introduction at Swedens largest retail chain

Thank you!
